{phocagallery view=category|categoryid=5|imageid=90|float=left} On Friday, 29.06.2012 next workshop were held in the framework of the LIFE + project of "Optimization methods for active protection of natural habitats in the Desert Błędowska". The workshop was attended by people representing mostly non-governmental organizations (including the chance of the White Przemsza, Poland Sahara, PTTK). During the meeting actions planned in the project were discussed .

Dr. Kamil Kulpiński from the Institute of Botany of the Jagiellonian University who leded workshop has discussed issues related to the primary objective of the project - the active protection of habitats in the Desert. Participants were discussed the possibility of cooperation within LIFE + project office and local NGOs.

The workshop aims was to present methods of active protection and how to implement the project. During the meeting, more people have acquired knowledge about the specifics of the project and the capacity to join their organization in the project activities.
